A Segmentation Case

A Segmenta

This pre-release version may be used for teaching purposes but it has not yet received an official case number by The Case Centre. No part of this publication may be copied, stored, transmitted, reproduced or distributed in any form or medium whatsoever without the permission of the copyright owner.

Mary looked out of the window. She then looked inside. It was time to start.

The Business Problem

It had been a rough year for Mary and her team. CreeqBoat, the boating company where she was Senior Manager in the Customer Insights department, had become a victim of the crisis in the boating industry. The management team was now exploring various growth options. Expanding further in some markets, in particular North America, was no longer something to consider for the distant future. It was becoming an immediate necessity.

The team believed that in order to develop a strategy for North America, they needed a better understanding of their current and potential customers in that market. They believed that they had to build more targeted boats for their most important segments there. To that purpose, Mary had been commissioned to make a segmentation project for that market. Being a data-friendly company, the decision was made to make the segmentation in a data-driven way – none of that soft hold-hands-and-discuss stuff.

The Data

With the aid of a market research firm, Mary gathered various data about the boating market in the US through interviews with almost 3,000 boat owners and intenders. The data (see Appendix) consisted, among others, of 29 attitudes towards boating, which respondents indicated on a 5-point scale (Q. 1, 1-29 in the Appendix).

Other types of information had been collected, such as demographics (Q. 11-15 in the Appendix). Finally, Mary had compiled information about the boats, such as the length of the boat they owned, how they used their boats, and the price of the boats (Q. 2-10 in the Appendix). Segmentation of the market would be done using all this data.

The Real Work

Part I: Data Preparation

Based on past experience, the decision was made to develop a segmentation that was mostly driven by attitudes that consumer held regarding boating – the attitudinal data from the 29 questions in Q.1. As a first step, Mary decided to simplify the data by grouping the 29 questions into a few meaningful sets/factors. This could be done using a standard method: factor analysis. She needed to answer the following questions:

- How many factors should she select? Why? Why not more or less?
- 2. How should she associate each of the original 29 variables to the factors selected?
- 3. How could she interpret the main factors selected? How should she name each factor by looking at the items that were most correlated with it (i.e., had the highest factor loadings).

Part II: Segmentation

Based on the factor analysis she would select certain attitudes that she could use in the segmentation algorithm. Potentially using some of the other available data as well (e.g. demographics, boat preferences), Mary could then move on to the actual segmentation of the market. In particular, she would need to:

- 1. Perform a (possibly two-step) cluster analysis of customers and prospects to discover segments in the market.
- 2. Decide on the appropriate number of clusters, based on various outputs and tables How many clusters should she choose? What would be the advantages and disadvantages of different cluster solutions?
- 3. Using whatever data from Q1-15, create high-level profiles of the segments that would be meaningful for the company. How could she best describe the segments?

agh-leve ow could be artegy of Greek and control of the wanted to even a dirty it she wanted to Mary knew that this would be a long, iterative process. Looking out of the window was not an option any more. She had to get her hands dirty if she wanted to ever understand the best way

Appendix

14. Which statement best describes your current employment status?

Working – as a paid employee1
Working – self-employed2
Not working – on temporary layoff
from a
job
Not working – looking for work
Not working – retired5
Not working – disabled 6
Not working – other

15. What is your age?

Boats: Brand Equity

16. Below are various statements that could describe brand's PRODUCTS, IMAGE or REPUTATION. Please indicate how much you agree or disagree with the statements for the **following brand** that you are familiar with: INSERT BRAND THAT NEEDS TO BE RATED (e.g. Alumacraft, Bayliner, etc.)

Strongly Disagree	Disagree	Neither Agree nor Disagree	Agree	Strongly Agree
1	2	3	4	5

Origin/ Heritage

1. Is a brand that has been around for a long time

Brand reputation

- Has best in-class customer service
- 3. Has a strong dealer network

Brand leadership

- 4. Is a leader in cutting edge technology
- 5. Is a leader in safety
- 6. Is known for its innovative products

Users of the brand

- 7. Is a brand for people who are serious about boating
- 8. Is a good brand for people that are new to boating
- Is a brand I see in the water all the time

Boating Experience

- 10. Offers boats that provide a fast and powerful boating experience
- 11. Offers the best boats for socializing
- 12. Offers the best boats for water sports (e.g., tubing, ski, wakeboard)

Aesthetics

- 13. Offers boats with superior interior style
- 14. Offers boats with superior exterior style
- 15. Offers boats that stand out from the crowd
- 16. Offers boats that look cool

Product Quality/ Reliability/ Innovation

- 17. Offers boats that can handle rough weather or choppy water
- 18. Offers boats that can handle frequent and heavy usage
- 19. Offers a wide breadth of product offerings and accessories

Product Safety

20. Offers boats that I can move around safely
